

With decades of industry experience, we apply our knowledge and manufacturing competencies

to developing superior flexible packaging for the dairy market.

Our products feature ease of use, along with functionality and esthetics.

Sustainability

Developing and producing strong, light films and bags – low carbon footprint

Shelf Impact

Various options for shaping and printing films, unrivaled transparency & gloss

Convenience

Improving packaging functionality with easy opening and reclosable products

Performance

High-quality, high-machinability, time-saving, cost-effective solutions

Did you know?

We offer wholesale and retail packaging solutions for every stage of the product lifecycle from the producer to the consumer.

Lidding and Top Web Films

Toplex / Topaz Range

Our Toplex range includes ultra-thin, co-extruded and laminated lidding films and top webs for packaging soft or hard cheese, chunks or slices, shredded or grated.

Key Features

- Ideally suited as lidding films on ready-made trays and as top webs on all TFFS lines, flow packaging films, map tray lidding and vacuum TFFS
- Super lightweight film, yet efficient, with low environmental impact
- Advanced barrier layer preserves taste, aroma and texture of soft or hard cheeses
- Unrivalled transparency and optical qualities for perfect shelf display

Products

Toplex RC

Reclosable lidding perfect for multi-serve sliced cheeses that demand high functionality

Toplex Peelable

A hermetic seal with easy opening that truly performs; for packagers, retailers and consumers

Toplex Locked Seal

Excellent mechanical properties seal through product residue at a wide range of temperatures

Toplex FP

Specifically designed to work trouble free on all VFFS & HFFS packaging machines, this product features optimal coefficient of friction

Topaz

Extremely thin film with exceptional optical properties, suitable for PET-based trays

Pouches and Liners

Our pouches and liners are designed to produce uniform cheese blocks, as well as reduce waste, repacking and returns from your customers. They also are customizable for all types of block cheeses – Cheddar, Swiss and others.

Key Features

- Correct barrier level optimizes product's shelf life
- Superior clarity ensures product visibility along the production process
- Strong seal and mechanical properties result in far less leakers and costly repacking
- Suitable for manual loading or automatic cheese towers

Products

40 lb (18 kg) bags

Gusseted or regular bags work trouble free on manual or automatic towers

Barrel liners (BL)

Known and depended on in the industry for their proven performance in reducing leaker rates on all types of filling equipment

640 liners

A wide range of high barrier 640 liners to meet your requirement of producing a smooth and uniform 640 cheese block

Swiss cheese pouches

Especially designed to enhance the "eye" formation of Swiss cheese

Vacuum Skin Packaging Plastofresh Range

With crystal-clear transparency, our Plastofresh vacuum skin packaging enhances the appearance of small chunk cheese and other specialty dairy products allowing for the finest presentation.

Key Features

- Designed for trouble-free performance with manual and semi automatic machines
- Different barrier levels: suited to product shelf-life requirements
- Seals to different sealing layers and to itself. Offers different levels of seal strength
- Excellent optical and forming properties. Featuring "second skin" appearance

Products

Plastofresh HB

A high barrier film suitable for refrigerated cheese, featuring "second skin", optimum gloss and transparency properties

Plastofresh HB HD

VSP top web for products packed in a high dome machine (more than 50 mm height profile). Suitable to use with most bottom webs

Thermoforming Films Multiform Range

Our field-proven forming films offer unparalleled performance compatible with all automatic thermoforming equipment. Suitable for packaging chunks and slices.

Key Features

- Outstanding forming properties enable deep draw with thinner forming films
- Excellent gloss and clarity offer premium product presentation
- Incorporated advanced barrier layers enable a wide range of oxygen transmission rates for optimal shelf life
- High impact and puncture resistance; perfect seals through product residue

Products

Multiform X-treme

Produced with revolutionary Aquafrost technology, Multiform X-treme has better optical properties than cast film, while retaining the excellent forming and mechanical properties of blown film

Multiform FW

Its unique structure allows significant down-gauging of the packaging thickness.

Available in a wide variety of tints and colors

Packaging Solutions

Whether it's sliced, grated, or bulk, our packaging keeps cheese fresh. Meeting our customer's individual needs is our highest priority; so we offer you a diverse portfolio of solutions.
